REASONS FOR ALLOWANCE

1. In claim 1, following the general formula (A₁), applicant recites, "X represents a hydroxyl group, a cyano group, an alkoxy group, or an alkyl group, *provided that at least one of the X's is not an alkyl group,*" and a few lines later, applicant also recites, "p represents an integer of 1 to 4". It is to be noted that the Examiner interpreted those phrases to mean that *if p is an integer of 1 (which means that there can only be one X), then X can only be a hydroxyl group, a cyano group, or an alkoxy group (i.e., X cannot be an alkyl group based on the provisional limitation).*

2. The following is an examiner's statement of reasons for allowance: In view of the amendment of August 15, 2005, previous 102(b) rejection on claims 1-7 and 12-14 over Yamada et al (Proceedings of SPIE) as well as previous 103(a) rejection on claims 8-11 over Yamada et al are hereby withdrawn. Although Yamada teaches a resin having a repeating unit, which contains two groups represented by the present formula (Z), Yamada does not teach or suggest present repeating unit (II), (III), (IV) or (V), each of which has to include a moiety of the present formula (A₁). Also, although claims of U.S. Pat. 6,939,662 B2 (which has an effective filing date of May 30, 2003, which is later than that (March 12, 2003) of present application) teach a resin having a repeating unit, which contains two groups represented by the present formula (Z), those claims do not teach or suggest present repeating unit (II), (III), (IV) or (V), each of which has to include a moiety of the present formula (A₁).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
